

Albin News No.1 2012

A newsletter from Albin Components AB

Increased capacity

To meet an increased demand, particularly for gears, Albin Components AB invests in a complete new production cell. Overall, it means an investment of about 20 million SEK.

The new equipment is now being installed, and in a couple of weeks the new production cell No. 10 will be in operation. This investment will increase the capacity to manufacture shaved gears in dimensions from 30 to 300 mm with tight tolerances.
